

# Fabricator

Pro Comp Suspension Systems, the leader in light truck aftermarket suspension systems, is seeking an experienced Fabricator to design and create a number of fabricated items while working independently.

The ideal candidate will possess the following skills and qualifications:

- High school diploma or equivalent
- 2 + years related experience in applicable engineering environment
- Basic working knowledge of metal fabrication skills and all related equipment
- Self-starter with ability to work with minimal instruction or direction
- Excellent communication skills
- Proven ability to plan and prioritize workload

Key responsibilities will include:

- Meet and comply with all safety regulations and guidelines
- Communicate daily regarding safety, workload and machine or component problems
- Working an environment based on teamwork and continuous improvement through support and execution of Lean Manufacturing practices (raising yields, improving quality, increasing throughput, and cycle time reduction)

Must have own tools for both fabrication and mechanical jobs.

We offer competitive wages and a full benefits package, including a medical, dental, 401(k) and company paid life.

For immediate consideration, please forward resume with salary history to:
